## Page 18

Message of the comrade commander during his meeting with congratulators on the occasion of Eid El-Adha El\_Mubarak (Greater Bairam=> Muslim holy feast day when they slaughter sheep's)

- Eid El-Adha will return and find us in the best condition.

- There is no spirit we hope to have that is better than the spirit we have now (as far as handling the state of affaire)
- What is the value of a human armed with faith and his/her wholly land is a disgrace such as the case of Al-Quods and the Arabic Golf?

Contents of the discussion held by comrade commander during his meeting with delegate of the Pope from Vatican:

- Iraqi position towards all religion is equal. He (Saddam) praised the pope's position to impose peace.
- United States intentions are known among the whole world.
- His (Saddam) protection of the wholly Christianity as well as the Muslim world.
- Ba'ath Party's manner is nationalist socialist and therefore we (Ba'ath party members) address our speech to this assembly in one Language (which is Arabic).
- The percentage of Muslims is the most dominant among Iraqi people, however we value human being based on their faith and donation without regard to religion.
- Protection of Christians in Iraq as well as Muslims with establishing churches and mosques and this is our mission. Our mission is also to build mosques in other nations as if they build churches.
- The comrade commander asked delegate of the pope to deliver Iraqi voice of peace and thank Vatican for their efforts.
- The Vatican must recognize who is the aggressor and who is the victim, so far, the Vatican has not taken definite position.

## Page 19

[There exists handwriting on top of the page which means: The content of the speech delivered by comrade commander on 10/17/2002.

The Greatest Pledge of Allegiance Day]

Wednesday July 10.

[The same date was written in Persian on the right side of the page]

[The speech in handwriting is as follow:]

- After 34 years, the period of August (The Greatest Pledge of Allegiance Day) came back again to make the history reflects on the present and future carrying tools of population, construction, sword, spear, rifle and cannon to tell to all the tyrants, arrogant and evils in the world that you can't defeat me.
- The most important tools to measure our virtue, righteousness intention, and determination are our deepest background in following the best samples of our nation in the beginning of Islam. We are in connection with the principals of Islam during the period of the Rashidin Caliphs (Rightly Guided Leaders), may God be pleased with them and gratify them.
- The comrade commander called upon Iraqi nation saying:
- Dear Iraqis: We advice you to continuously work with honesty, persistence and faithfulness to ensure the present, the future of yours and the generation that follows. We also advice you to battle with enthusiasm, ardency and endurance because they are the source of construction, prosperity, independence, freedom, justice and fairness.
- Anyone who does not feel related by blood to defending his nation (Any Arab nation in this case) when it faces injustices is not worth to be a leader or commander.
- Anyone who is not capable of transforming capital into power- beyond its worthiness- to influence the source of resolution has no signification to be in political and juristic justice. The battle against wolves and filthiest will not succeed as long as they have assistant and partners inside government and sovereignty palaces (Talking about Golf States leaders for their cooperation with the west)

On the bottom of the page there is a saying:

It is necessary for a group (body) to have a worshiped, be it individual, doctrine or formula.

Thursday July 11.

[Page is unreadable, the writing is reversed]

At the bottom of the page there is a saying:

The science does promote human and boost him financially morally and ethically.
